

# Twiny

Double your presence –  
increase your effectiveness!

With Tex Visions newest innovation customers can read your ad from both sides. The innovative fabric and production process enables us to print two positive images for Point of Purchase (POP) displays, and interior decoration specials. All images can be realized by chemical screen or digital chemical dye printing.

**It is even possible to have two different images on the front and reverse side. There are no limits to your ideas!**

A brief overview of your advantages:

- Two sides – double presence
- Two positive images on fabric – no mirror image
- Different designs on front and reverse sides are possible
- Fabric maintains typical characteristics
- Perfect presentation of your brand

### Use:

- Point of Purchase
- Events and celebrations
- Museums and exhibitions
- For short term outdoor decoration

**...and anywhere you want to double your presence.**

Shopping Center, North Entrance  
The banners attract attention and every customer can read the advertisement.

Shopping Center, South Entrance  
From this direction every customer can read the advertisement as well.
