

SNAP FRAME LED Lightbox

Technical Specifications | R1.050613

PRODUCT USAGE

This product is recommended for use indoors.

DESCRIPTION

The Snap Frame Lightbox is a slim wall display constructed of a sturdy aluminum frame. Similar to our other snap frame products, the Snap Frame Lightbox features sides that snap open without tools so prints can be installed in seconds. The print can also be changed effortlessly for a new look. This display comes with an anti-glare protective cover, ensuring the print lasts as long as possible, and our power cord 72", giving you the flexibility to mount it in various different locations. Holes are drilled into the back of the frame for mounting and LED lights are used for even lighting without hot spots. The Snap Frame Lightbox can be used indoors to advertise movies currently playing at a local theater or to promote a new drink at a dimly lit bar.
